

Dhananjaya

Objective

To work as a Full Stack Software Engineer in a collaborative environment that values teamwork, code quality, and continuous improvement, while developing efficient, maintainable, and scalable digital products.

Projects

ServeHub – Home Service Booking App

Technologies: Flutter, Firebase

- Built a multi-role Flutter app for customers and service providers.
- Integrated Firebase for real-time data sync and authentication.
- Included 6+ service categories and smooth booking management.

BookTrack - Library management System

Technologies: Python, Django, MySQL

- Designed a full-featured system for tracking book checkouts, returns, and overdue books.
- Created an intuitive admin interface and automated reminders.

TeamTrack - Employee Management System

Technologies: Python, Django, SQLite

- Developed a dashboard for managing employee records and reports.
- Enhanced productivity through easy data access and CRUD operations.

GameZone – Gaming Website

Technologies: HTML, CSS, Flask, SQLite

- Created an interactive gaming site with multiple games and review features.
- Integrated a simple UI for rating, reviewing, and exploring games
